ABOUT ME

Full-Stack software developer with a background in fine-arts and customer service. Blending creativity with code to solve problems and always striving to make the results beautiful. I value shared experiences with teammates and clients alike.

TECH SKILLS

languages
- JavaScript
- TypeScript
- HTML
- CSS

testing
- Jest
- QUnit
- SuperTest

frameworks & libraries
- Node.js
- Express
- PostgreSQL
- React
- Redux
- React -Native
- Vue

EDUCATION

Alchemy Code Lab   2020

6 months of intense code immersion with focus on JavaScript, React, Node.js, Express and PostgreSQL. Here I learned many tools for advanced problem solving.

Portland Community College   1994 - 1997

Fine Arts, focused on life painting and drawing.

WORK EXPERIENCE

Parthenon Software Group 9/2021-present
Software Developer
Building and maintaining custom software for a variety of client needs. Delivering elegant solutions to complex problems leveraging a wide range of technologies.

Alchemy Code Lab   1/2021-6/2021
Software Development Teaching Assistant
Teaching the next generation of developers. Focused on JavaScript, React, Node.js and PostgreSQL.

Goldrush Coffee Bar   2004-2020
Owner / Operator
Community and quality were paramount to the vision. Here I learned many sides of small business operations including actively supporting the local community, hiring and management of staff, inventory management, bookkeeping, accounting and customer relations. Problem solving was the common thread woven throughout my many daily tasks.

FREELANCE WORK

eskart.net 2022   *visit the site*
Created this artist's gallery with Quasar/Vue and TypeScript on the front end and NodeJS, utilizing the Cloudinary API on the back. The artist can upload their own high quality images and manage all their own content with a protected admin route.

Amphead-Lanham 2021   *visit the site*
Designed and developed this full-stack web app for a local business. A NodeJS/Express backend API with PostgreSQL database, serves the data. A React/Redux front end brings the UX. Protected routes give the site owner power to manage content through an admin UI.

michaelalbano.art 2021   *visit the site*
An artist's gallery built in React with Typescript and a mobile-first design.

NOTABLE PROJECTS

nerdMeme   *nerdmeme.fun*   *github*
NextJs, Express, React-Native, PostgreSQL
A random meme generator including A web app, Android app, and an api to serve both.

Convertron 5000   *github*
Express, React-Native, TypeScript
A handy mobile app for everyday conversions.
